

PHILIPS

Lifeline

Medical Alert Service

The Philips Lifeline Difference

There's a reason why Philips Lifeline has been recommended by more than 250,000 healthcare professionals.¹ That's because when it comes to medical alert services, not all companies are created equal. We can find the right medical alert service that suits your patient's needs.

It's as easy as 1-2-3 !

Step 1. Answer these two questions

Does the patient have an **implanted cardiac device**?

Yes

Choose **HomeSafe**

No

You can choose either
HomeSafe or GoSafe.

Continue to next question

Does the patient still lead an **active lifestyle**?

Yes

Consider the **GoSafe mobile**
medical alert service.

No

Consider the **HomeSafe**
medical alert service.

Step 2. Let patients know that Philips Lifeline is more than just dialing 9-1-1

Obtain their consent to enroll in our service

Step 3. Call in a direct referral

One of our qualified representatives will review the options available with your senior and their family to help select the service that's right for them.

Philips Lifeline
is the

#1

provider of medical
alert systems in
the U.S. today²

Is it time for a medical alert service?

At Philips Lifeline, we want your at-risk patients to continue living their life the way they always have, with confidence. Philips Lifeline has the right personal alert system to meet their individual needs.
